

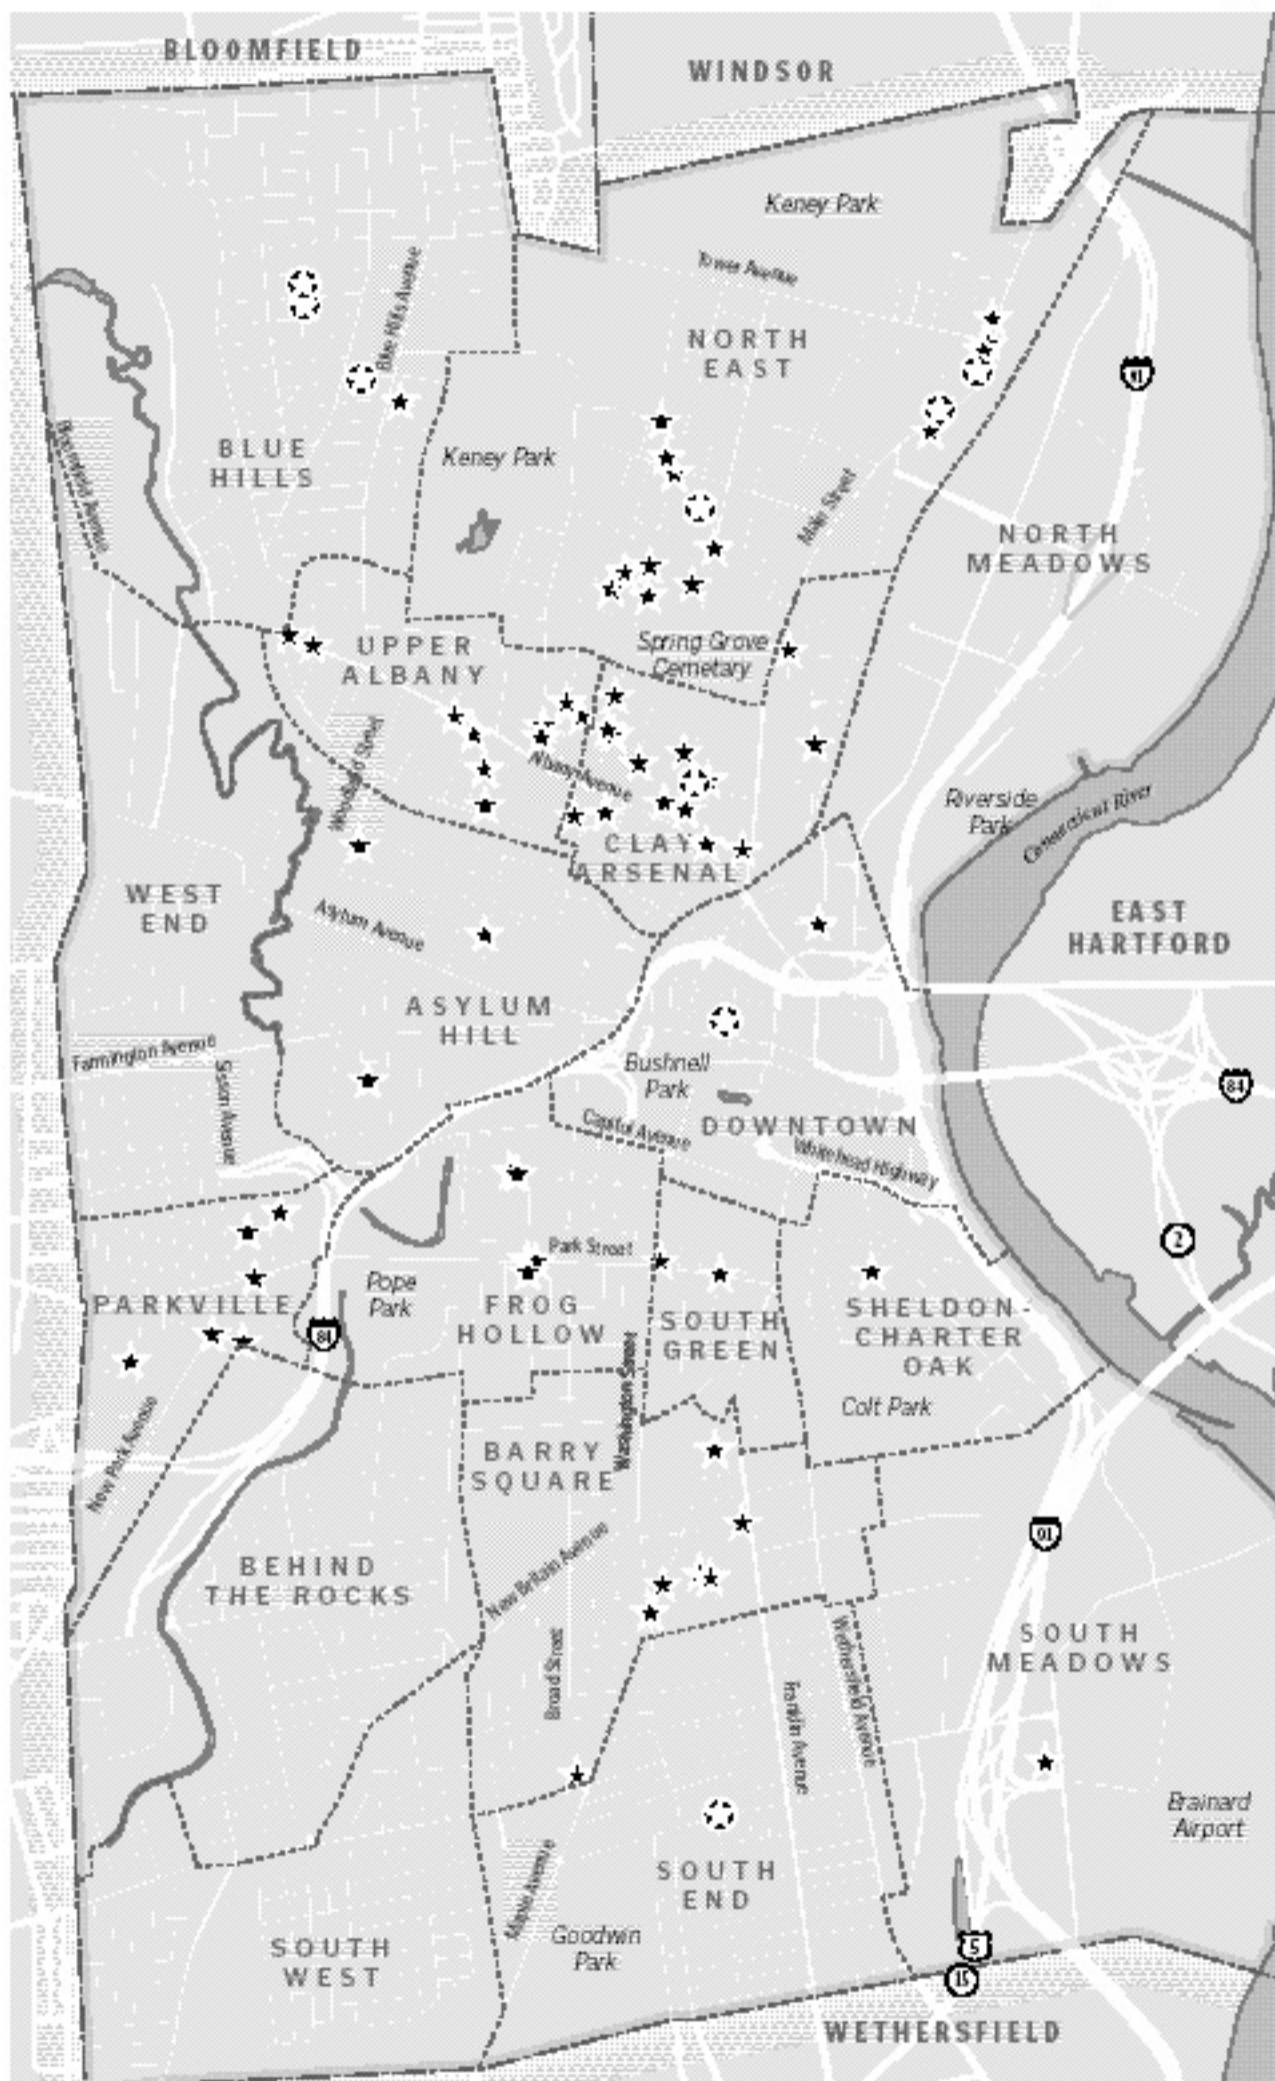

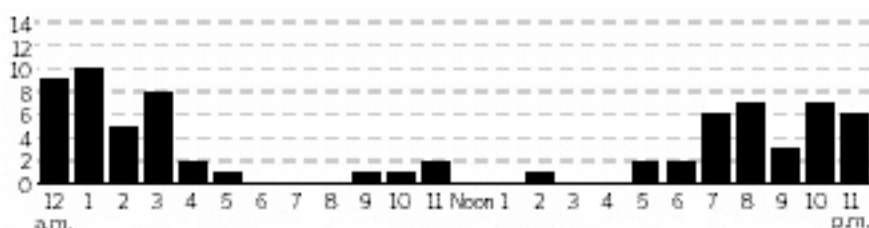

Mapping Gun Crime

A computerized map of Hartford, the kind that police rely on to gauge criminal activity in the city, shows the locations where people were shot or murdered by guns in Hartford between Jan. 1 through June 11 of this year.* Maps such as this one are a key part of Police Chief Patrick J. Harnett's strategy in fighting crime. By plotting hot spots, he and his commanders can decide where to deploy officers and members of a gun task force.

★ Person shot ☉ Murder by gun

Shootings By Time Of Day

* Police have not yet entered nine cases of people shot into a neighborhood mapping system.
