INTRODUCTION TO THE CAPITAL IMPROVEMENT PLAN

The following section illustrates, in detail, the expenditures and revenues within the Capital Budget appropriation. The Capital Budget and the General Fund are the only two funds appropriated by the City Council.

The City of Hartford's Capital Improvement Program (CIP) is designed to implement many of the long-range objectives of the Hartford Plan of Development adopted by the Commission on the City Plan in 1996.

MANAGEMENT CONSIDERATIONS

The Fiscal Year 2009-2010 through 2018-2019 Recommended Capital Improvement Program strives to balance and distribute limited resources to meet the City's most critical needs over the next ten years. The primary emphasis is to preserve the existing infrastructure. While the City of Hartford looks cautiously forward to new and creative development efforts to stimulate the City's economy and tax base, it is important to maintain fiscal conservatism. This poses a challenge to City leaders who must seek to preserve and improve the existing physical plant so that the City's operating departments, Hartford Public School System, and the Hartford Public Library may effectively deliver services. The Recommended Capital Improvement Program was developed in consideration of the following factors:

- Infrastructure Preservation
- Maintaining and improving the City's park system
- Subsidizing project costs with Federal Stimulus Funds
- Prudent financial planning

FUNDING REQUEST

The FY 09-10 Capital Budget's annual required funding amount is \$47,170,000 of which \$14,100,000 is earmarked for new project expenditures. A Capital Improvement Fund Appropriation Ordinance in the amount of \$14,100,000 is included in the Legal Documents Section. The City makes every attempt to finance the Capital Improvement Program through the use of outside funding sources such as Federal and State grants and Hartford Park Trust Funds (HPTF).

CATEGORY OVERVIEW:

The Capital Improvement Program, funded through the Capital Budget appropriation, was reviewed with department managers for possible impacts on operating budgets and services. The projects fall into one of five major project categories: Public Safety Facilities, Public Facilities, Parks and Recreation, Infrastructure and Educational Facilities. Below projects are identified within their category stating financial impacts on current and future year budgets as well as non-financial impacts on services.

Public Safety Facilities

The Public Safety Facilities capital improvement projects are designed to maintain, improve and construct facilities for use by all public safety departments. Public Safety Facilities projects primarily focus on the repair, restoration and renovation of existing facilities, however at times new construction will take place. One improvement of note is the new construction of a Public Safety Complex in the downtown area. The complex will impact future operating costs such as: staffing, supplies, information systems, computers, software, phones, utilities and minor repairs. Conversely, there will be reduced transportation costs for public safety vehicles with shortened travel times to downtown locations. The increased visibility of public safety employees is also expected to stimulate new development, increasing future revenues by increasing the taxable grand list. In addition, the complex will have a non-financial impact on services by improving response times for public safety employees to downtown locations, centralizing public safety communication operations and increasing the visibility of public safety employees in downtown areas through an added presence.

Public Facilities

The Public Facilities capital improvement projects are designed to maintain, improve and construct all public facilities for use by non-public safety departments. Public Facilities projects primarily focus on the repair, restoration and renovation of existing facilities, however at times new construction will take place. One improvement of note is the new construction of the Parker Memorial Center/Kevin D. Anderson Gymnasium. The center and gymnasium will impact future operating costs such as: staffing, supplies, information systems, computers, software, phones, utilities, landscaping and minor repairs. The gymnasium will require sporting equipment and its maintenance; the weight room will require weight training equipment and its maintenance; and the pool will require pool equipment and its maintenance. In addition, the complex will have a non-financial impact on services by providing multiple recreational activities while incorporating educational opportunities. These activities include but not limited to: basketball, swimming, weight training, table games, computer use and arts and crafts. The structure will also provide a community room with attached kitchen for the public's use. Conversely, there will be a reduction in operating costs over time as the new building will be more energy efficient. In addition, the complex will have a non-financial impact on services by providing multiple recreational activities while incorporating educational opportunities.

Parks and Recreation

The Parks and Recreation capital improvement projects are designed to maintain, improve and construct all park facilities. Parks and Recreation projects primarily focus on the repair, restoration and renovation of existing park facilities, however at times new construction will take place. Of the multiple planned projects a few will slightly impact current and future operating costs. The City has the Recreation Division and Office for Youth Services already in place to meet additional service needs and the Public Works Department to maintain the additional fields, the future operating impact will not be substantial. In addition, the fields will have a non-financial impact on services by providing added recreation opportunities.

Infrastructure

The Infrastructure capital improvement projects are designed to maintain, improve and construct the City's fundamental facilities, services and installations needed for the functioning of the City. Infrastructure projects primarily focus on the repair, restoration and renovation of existing infrastructures, however at times new construction will take place.

Education Facilities

The Education Facilities capital improvement projects are designed to maintain, improve and construct the City's public schools. Education Facilities projects primarily focus on the repair, restoration and renovation of existing schools, however at times new construction will take place. The decision to construct the new schools is based upon demographic information and the desire to provide additional education specialization options for City students. The construction of the new schools will impact future operating costs such as: staffing, supplies, information systems, computers, software, phones, minor repairs, textbooks, library materials and other materials needed for educational purposes. In addition, the schools will have a non-financial impact on services by providing education specialization opportunities, smaller class sizes and after-school activities. These after-school activities include but not limited to: basketball, table games, computer use and arts and crafts.

Project Descriptions

Stimulus Projects

This year is unique in that the Capital Plan includes projects that have been identified for potential funding through federal stimulus funds. Efforts will be made to identify funding.

Stimulus projects have been drawn from the 2010 planning effort and other neighborhood planning efforts including the Redevelopment Planning for the three major downtown plans and Parkville Municipal Development Plan process.

2010 projects were identified by the Trident Committee process of the last several months and we are advancing them ahead of their formal adoption by the 2010 Implementation Committee in order to secure a place in the queue.

The 2010 Implementation and Trident Committees were appointed to review the 2010 Study recommendations.

Public Facilities

Public Safety Complex

A new Public Safety Complex will be constructed at the intersection of High and Ann Streets. Plans have been approved by the Historic Preservation Commission and the Planning and Zoning Commission. Demolition of structures will soon be underway. This project is approved at \$ 77 million.

Public Safety Complex

This line item represents grant funds received for this project.

City Hall Restoration (Windows and Doors)

This project will restore the windows and exterior doors of City Hall, including the 4 sets of revolving doors, over 200 wood windows, and 58 large arched windows.

City Buildings ADA Modifications

This project is bringing city buildings into compliance with ADA requirements, in response to the Department of Justice's report that revealed that City buildings need to be addressed.

City Buildings Environmental Compliance

This project will complete environmental surveys for all existing city buildings, making them safe for City employees and the public, and preserving the city's infrastructure.

The project will:

- Inventory all asbestos containing materials, lead paint, and suspected mold conditions
- Prepare a management and abatement plan and
- Abate hazardous materials.

Renovate Bathrooms at Various City Buildings

The City currently has many buildings with inadequate bathroom facilities. This project will bring those facilities up to modern standards.

525 Main Street Building Renovations

These funds will allow the first phase of necessary health and safety code updates at the City Hall Annex to commence.

City Hall Entrance Plaza Improvements

This project aims to replace the stone pavers on City Hall's Main Street Plaza, remove and reset the existing stone steps and landings, and reset and restore existing fountains.

<u>City Building Energy Conservation, Security, Technology and</u> Communication

This project involves the expansion and improvement of the citywide network, and includes the implementation of citywide security and energy management protocols. This project interfaces with all City facilities and programs, ultimately allowing for the completion of the City Consolidated Communications Plan. It will improve security and temperature controls in City buildings. This project will allow for the more efficient and effective management of facilities and programs.

Elevator Replacements at 525 Main Street

This project will replace an old elevator that frequently needs repair.

Long Term Document Archive and Storage

The City needs to create a long-term, low cost document storage facility to consolidate and manage required documents. The City now uses over 55,000 square feet of habitable space for document storage. This project calls for the creation of a manageable, efficient space for document storage in the City Hall basement.

Municipal Facility Renovations

This project involves carrying out necessary renovations in a number of City facilities. It will reduce the city's operating and maintenance costs, and provide for the more efficient delivery of services.

Salt Shed and Truck Wash at 40 Jennings Road

Additional funds are needed to construct a Salt/Sand storage facility and a truck/equipment washing facility at the DPW yard. This shed is needed to comply with environmental laws.

Burgdorf Environmental Clean up & Campus Planning

This project aims to perform the necessary removal of asbestos and lead paint from the Burgdorf Building at 80 Coventry Street. The project will also develop a plan for the campus of buildings at this site. \$ 3 million dollars has been approved and is available.

Energy Projects

These projects will install energy efficient lighting, high efficiency HVAC units, pumps and motors. Also retro commissioning of existing buildings, upgrade and/or integration of building automation controls for increased efficiency and occupant comfort, and energy audits for project prioritization.

North End Senior Center Renovation and Addition

This project is a renovation and expansion of an existing building. Interior areas include the kitchen, multi-purpose room, arts and crafts room and HVAC improvements. A 1500 square foot addition provides for a new community room, additional storage and an expansion to the existing exercise area. The project also includes some parking lot and courtyard site improvements.

Parker Memorial Center/Kelvin D. Anderson Gymnasium

This is a project to build a new 36,338 square foot recreation building in two phases, consisting of basketball courts, a pool, locker rooms, game room, classrooms, weight room and community room. Phase 1 consists of adding a gymnasium, weight room, locker rooms, and a pool on the west half of the building. Phase 2 involves demolishing and removing the existing east half of the building and adding a community room, arts and craft rooms, classrooms, a game room, computer lab, kitchen for the community room, and bathrooms.

New Blue Hills Recreation Center

This is a project to provide an approximately 10,000 square foot Recreation Center to serve recreation programs and community needs.

Roof Replacement at Various City Buildings

This project will replace roofs at the ADRC Building, the Infant Day Care Building, the McCook Maintenance Building, Willie Ware Recreation Center, Dillon Stadium Field House, and the Zion Hill Cemetery Building. These roofs all are in poor condition. Some of the roofs leak, and are expensive to maintain. This project will preserve the infrastructure, and be cost effective.

Boiler Replacement at Various City Buildings

This project will replace the heating systems at 525 Main Street, and the Pump Stations at Keeney Lane, the South Meadows, and the North Meadows. These heating plants are old, deteriorated, inefficient, and often need repair. This project will help to preserve the city's infrastructure, and be cost effective.

Albany Ave Library

This project involves the replacement of the present Albany Avenue Library.

\$ 3 million has been approved and an additional \$ 3 million is being utilized from a previous Library Bond.

Parkville Community Library

Improvements and an addition to the Parkville Community Library are under design.

Upper Albany – John. E Rogers Cultural Center

This project is a renovation of the former Northwest Jones School into the John Rogers Community and Cultural Center.

Lyric Theater

The Lyric Theater is a former theater that is now owned by the City. The goal of this project is to stabilize the vacant and deteriorating building.

Pope Park Improvements

This project involves the implementation of the improvements called for in the Pope Park Master Plan.

Parks and Recreation

Batterson Park Infrastructure Improvements

This is a proposed project to renovate the existing buildings and construct new buildings at Batterson Park. The deteriorated bathroom building, office, and garage buildings are to be renovated, while the existing Bath House will be demolished and a multi purpose building will be constructed in its place. The Department of Health and Human Services is currently updating the plan.

Elizabeth Park Improvements to meet Zoning Approval

A new parking area and access improvements were required in the area around Elizabeth Park's Pond House to meet the zoning approvals stipulated by the town of West Hartford.

Outdoor Pool Component Replacement

The project will address the need to replace components of the City's outdoor pools.

Citywide Playground Enhancements

This project will allow for ongoing upgrades at City playgrounds.

Park Monuments and Spray Pools - Restoration and Improvements

This project will restore park monuments throughout the City, build spray pools and in addition address water and operational feature problems at the Corning Fountain.

North Cemetery

This plan proposes to restore the historic monuments, markers, memorials, vaults and buildings in the North Cemetery.

Soldiers and Sailors Memorial Arch

This project aims to restore the Soldiers and Sailors Memorial Arch spanning Trinity Street in Bushnell Park.

Keney Clock Tower Renovation

This project aims to restore the Keney Clock Tower.

The Old Barbour Street Circus Grounds Improvement Program

This proposal aims to construct a Hartford Circus Fire Visitors Center/ Museum, which would front on Barbour Street. It would construct a separate entrance drive and parking area for visitor parking (12 spaces), grade and landscape an open space, install a simple drainage system, and clear and grub the perimeter of the property

Completion of Pulaski Pedestrian Mall

This project will complete the Pulaski Pedestrian Mall.

South Green Ornamental Fence Replacement

This project will replace deteriorated historic fences in the Old South Cemetery and South Green. These replacements will enhance the appearance and security at these historically significant sites.

Goodwin Improvements

This project calls for the renovation, repair and expansion of the Goodwin Park Pond House.

Keney Park Guide Rails

This project calls for the installation of guide rails along park roadways to direct and curb traffic, prevent illegal dumping, and beautify the road.

Keney/Waverly Expansion of Athletic Fields Along Tower Avenue

This project would expand the existing athletic facility at Waverly Field by adding additional soccer/football fields. There is a heavy demand for additional playing fields, and combination fields provide flexibility in use. This project is an expansion of an existing facility and improves the city's infrastructure.

Reforestation of City Parks

This project continues the reforestation (replanting) of woodland areas with suitable tree species to protect the City's green spaces. The project also calls for the development of at least one tree nursery in the City of Hartford. Due to a loss of native forest species attributable to age, insects, disease, and natural catastrophes, the health of Hartford's woodlands is at risk. A planting program will preserve our green spaces well into the twenty-first century.

Pope Park Improvements IV

This is a continuation of the implementation of the improvements called for in the Pope Park Master Plan. This project addresses the Bankside Grove section along Park Terrace across from Burns School. Proposed improvements for this area are enhanced walkways and amenities, improved security, and visibility, and enhanced maintainability.

Pope Park West Improvements

This project would reclaim a slice of Pope Park cut off by I-84. The Parkville Industrial Area surrounding the Park is being reborn with new uses, including housing. The City has established an IROD for housing conversion across from the park; however this part of the park is currently unsightly and discourages visitors and investors.

Park River / Park River North Greenway

In response to the Plan of Development's call for the development of greenway trails within the city, this proposal aims to construct two greenways in Hartford.

The Park River Greenway will run along the south branch of the Park River from Newfield Avenue to Hamilton Street. This multi-use trail will be 1.8 miles long and used by cyclists, rollerbladers, joggers and walkers. The first phase of the Park River Greenway will be funded by a grant of \$500,000 from DEP.

The Park River North Greenway project will create an additional greenway along the north branch of the Park River. This trail would run from the University of Hartford to Farmington Avenue.

Bushnell Park Vehicle Access Control and Erosion Control Measures

This project would put controls in place to limit vehicle access, widen internal walkways to accommodate limited vehicular traffic, and permanently repair eroded areas in Bushnell Park.

Urban Forestry, Recreation and Park Improvements

A recent study by the Trust for Public Lands, documented what has been well known. Our parks desperately need an infusion of park maintenance and upgrade. Economic stimulus funds would be used for urban forestry and park improvement such as road and trail maintenance and educational programs. City parks targeted are Colt Park, adjacent to the Colt National Landmark, and Keney Park in north Hartford. Keney Park could benefit from

thinning out the brush and by raising the canopy along the frontage of the neighborhoods. This would give the park back to its neighbors.

Infrastructure

Street Rehabilitation & Road Improvement

This proposal continues the City's program to repave and reconstruct existing city streets. This program constitutes a large portion of the City's planned street infrastructure upgrades and compliments other grant-funded reconstruction/realignment projects. This project reserves the City's existing infrastructure.

Streetscapes

This project is the ongoing streetscape improvement program planned for major arteries of the City.

Flood Control Infrastructure Improvements - Local

This project continues the City's long-range flood control improvements. Renovations of various components of the flood control system are needed due to age and deterioration. Currently, the City is upgrading its flood control system with funds approved by voters in a year 2000 referendum.

Flood Control Infrastructure Improvements - State

This represents a request for State of Connecticut assistance.

Central Business District Street Light Replacement

This project replaces old street light poles with new foundations, poles, and luminaries in the central business district and surrounding areas. Existing poles have been structurally weakened by rusted transformer bases.

Matching Funds for State/Federal Infrastructure Grants

This proposal is to assure that funding will be available for the City's match of State Federal Grants received. Most State Federal Grants programs require a 10-20 percent match in order to leverage State Federal Funds. These projects are used to maintain and enhance the City's infrastructure. This proposal calls for \$500,000 in each of the first 5 years of bond sales to provide the appropriate match.

City Bridge Rehabilitation Program

The City owns approximately 12 local bridges, which need periodic repairs.

Citywide Sidewalk Replacement

This project will replace existing sidewalks in the city that have deteriorated due to age, damage and other factors. This project preserves the City's infrastructure and reduces the City's liability.

Economic Development Site Acquisition & Development

This fund provides for an Economic Development Site Acquisition Revolving Fund to meet emerging needs in a timely fashion.

Albany Avenue Streetscape

This joint project of the State, City, and MDC will address roadways, sidewalks, and sanitary sewer problems on Albany Avenue.

Neighborhood Development Fund

This multi-year fund has been created to spur the rehabilitation of blighted buildings in six Neighborhood Investment Areas that contain the heaviest concentration of boarded buildings. Portions of these areas are located in the Northeast, Upper Albany, Clay Arsenal, South Green, Barry Square, Parkville, Frog Hollow, and Behind the Rocks neighborhoods. \$ 2 million has been approved

Clean Water Related Infrastructure Supplemental Funding

This project will fund the repair and upgrade of City-owned infrastructure such as sidewalks, roadway structures, curbing and lighting that are not covered by the MDC budget but are impacted by the MDC Clean Water Project.

Brookfield Street Reconstruction/Bike Facilities

This project is to reconstruct Brookfield Street from Flatbush Avenue to Hamilton Street to complete a portion of the bikeway project. Items to be reconstructed in this project include guiderail replacement, intersection reconfiguration at Flatbush Avenue and the installation of bike lanes on Brookfield Street.

Downtown North/West Redevelopment Plans Site Acquisition

This project supports the three redevelopment plans adopted by the Planning and Zoning Commission, the Hartford Redevelopment Authority and the Court of Common Council for Downtown North, Union Station/Walnut Street and Constitution Plaza East redevelopment areas. \$ 5.5 million has been approved

Sewer Replacement at #2 Holcomb

The City owned sanitary sewer connection from the #2 Holcomb complex to the MDC system is deteriorated and in need of urgent repair. This project calls for replacement of a 300 feet long section of the pipe that also crosses underneath Gully Brook.

Completion of Citywide Handicapped-Accessible Curb Ramps (DOJ/UFAS Compliance) Install handicapped accessible curb ramps for sidewalks and street intersections for approximately 108 intersections throughout the city.

Street Resurfacing and Repairs

This is an ongoing project for the City to keep local streets in good condition.

Citywide Neighborhood Traffic Calming

This project will continue the implementation of the Citywide Neighborhood Traffic Calming Master Plan. Various traffic calming devices will be installed throughout the City to reduce excessive speed and cut through traffic on residential streets.

Plan of Conservation and Development / Neighborhood Planning

This project funds the update to the City's Plan of Conservation and Development. The present Plan of Conservation and Development was adopted in 1996 and amended in 1998. These State of Connecticut funds will also be used for the specialized studies that serve as components of the Plan.

Citywide Decorative Light Replacement

These funds will be used to replace elements of the decorative lights that beautify and celebrate the City of Hartford.

Burgdorf Complex Plan

This project is to prepare a consolidation plan for this complex. The goal will be to take McCook offline and reuse the Burgdorf complex. This project is the first of a multi-year program to consolidate for efficiency improvements.

2010 Citywide Traffic Signalization

In order for older American cities to compete, it is critical to invest in technology infrastructure. Hartford has a unique opportunity to integrate a number of downtown shelf ready initiatives into an overall plan that could be a model for the nation.

Wireless Communication Access:

Upgrade to traffic signalization system:

A recent study by an outside consultant identified this as a critical issue in several areas of the downtown, as well as connections from the adjacent neighborhoods to the downtown.

Downtown Circulation:

A current study will be reporting on turning one-way streets to two-way streets to better serve the changing nature of the downtown as well as connecting Downtown North with the central business district. In addition, in the last six years the number of residential units in the downtown has tripled. The State of Connecticut has instituted a free shuttle bus to transport residents, shoppers, conventioneers in the downtown.

The State of Connecticut has invested in a modern convention center, which opened in 2005.

All of the above point to a great opportunity to integrate multi-modal transportation and technology systems. This includes pedestrian walk lights, fiber optic traffic signalization connections, traffic cameras, bus shelters, sidewalk construction, and way finding kiosks, Wi-Fi expansion and signage.

2010 Farmington Avenue/Asylum Avenue/Broad Street Realignment

This project will address safety issues along these corridors that were identified in the Hartford 2010 process, and enhance pedestrian connections between Asylum Hill and Downtown.

2010 South Green Traffic Improvement

This project addresses the recommendations of the 2010 committee regarding the beautification of Barnard Park, the improvement of traffic circulation signage and issues regarding the shelter.

2010 Albany Avenue and Main Street Improvements

This project will realign Albany Avenue and Main Street to improve traffic safety, circulation, and pedestrian access.

2010 Terry Square – Economic Development

Remove blight and improve streetscape and landscaping. Provide enhanced facades and acquire an economic development parcel.

2010 Homestead Avenue Brownfield Redevelopment

There are serious environmental concerns related to several sites along Homestead Avenue because of the nature of the former businesses. The City has control of the sites. This project is to remediate and make the properties available for redevelopment.

2010 Main Street Streetscape Project

This project would provide a facelift to Main Street from South Green to I-84. An initial design and scope of work will be developed.

Parkville MDP

This project begins improvements that were identified in the Parkville Municipal Development Plan.

Wethersfield Avenue Streetscape

This project would expand the streetscape network already started on many of Hartford's arterial streets. Limits are proposed to be from Airport Road to the Wethersfield Town line. Project would include typical streetscape elements including brick pavers, traffic calming, pedestrian enhancements, decorative lighting, etc.

Pope Commons Streetscape Improvement

This project expands on the streetscape work already started on Park Street and extends to Capitol Avenue.

City Wide Sidewalk Replacement

This project will replace existing sidewalks in the city that have deteriorated due to age, damage and other factors. This project preserves the City's infrastructure and reduces the City's liability.

Education Facilities

Pathways Magnet School

This 9-12 technology high school is currently located in a leased property at 184 Windsor Avenue in Windsor. While the funds from the state have been approved for several years, a permanent location to build a new magnet school is yet to be determined.

Capitol Prep Magnet School

This 6-12 college preparatory magnet school is located in Capitol Community College at 950 Main Street in Hartford. Barnard Brown School is currently under renovation as the new permanent site for this magnet school. It is scheduled to open in January 2010.

Bellizzi Middle School

This 5-8 school is scheduled to become a PreK-8 School of Asian Studies in the 2011-12 school year. Renovation of the current portables and a small addition to the school will occur. Dwight Elementary School will close when Bellizzi opens as a Pre-K-8 school.

Northeast High School

This building at 150 Tower Avenue is scheduled to become a 9-12 school for 400 students. The theme of the school is to be determined.

Quirk Middle School

One side of Quirk Middle School is scheduled to be renovated to become the permanent location for the IB Global Studies Academy for grades K-12. There will be 1000 students at full capacity and he building will be completed for the 2012-13 school year. The side of Quirk that houses the auditorium is not scheduled for renovation at this time.

Montessori II

This second Montessori Elementary School will begin at Moylan School in the 2009-10 school year and incrementally develop a "School within a School" model over the next three years. Funds will be used for classroom modifications to accommodate the Montessori program.

M L King

This school will begin a Gifted and Talented Program in the 2009-10 school year. The program will move into the renovated Fox Middle School in 2015-16 at which time MLK will close.

Bulkeley Upper School

The Upper School is scheduled to begin a program for 11-12th graders in Advanced Languages in Spanish and Mandarin in the 2011-12 school year. Funds will be used to build a Language Lab and UN Council Room for students.

Burns

This PreK-8 school of Latino Studies will require a Languate Lab as well as renovation work in the entryway.

Opportunity High School

This alternative 9-12 school of 200 is for students who are under-credited and over-age and are in danger of not graduating. It is currently being planned for the portables and Automotive Center of Bulkeley High School.

Achievement First Hartford

This K-8 charter school is currently housed at Twain Elementary. In the 2010-11 school year it will need more space and will move to Fox Middle School as its permanent location. The funds will be used to improve Fox Middle for AF Hartford.

Breakthrough II

This PreK-8 school has a theme of Character Development. It will need school modification work as it moves into Twain fully in the 2010-11 school year.

Hooker

This Pre-K-8 magnet school of Environmental Studies will temporarily move into 245 Locust Street when Kinsella moves out in July 2009. It will remain there until the renovated school is complete for the 2010-11 school year.

M.D. Fox Elementary

This PreK-8 CommPACT school has a two part renovation program scheduled. This summer will be Phase 1 window replacement and Phase II, "renovate as new" will be completed for the 2012-13 school year.

CAPITAL IMPROVEMENT PROGRAM MATRIX

The following five pages represent a matrix format of the capital budget expenditures description presented above for Fiscal Years 2009-2009 through 2018-2019 Recommended Capital Improvement Program.

^{*} The State of Connecticut changed the method of reimbursing cities for school construction. Previously cities were required to sell bonds to fund the entire project and the State would reimburse over the life of the bonds. Currently the State reimburses in an ongoing basis at various percentages (70% to 95%) during construction. The percentages vary by project however 75% could be applied as a guide. School projects marked "*" were 100% bond authorized however using the guide approximately 75% will be reimbursed from the State.

The following schedule represents is a comparison of appropriations to expenditures and encumbrances as of April 9, 2009
